Federal Record Status Not Determined

---

to whom it may concern

i am deeply concerned with the yucca mountain project, and i know most american's would be if they were aware of the problems that will be faced in this venture. not only nevada but many other states will be involved when the hazardous waste is shipped to that location. i am also concerned with the shipment of hazardous waste from the european countries that will be involved. how many accidents have you considered will happen with the shipment of the hazardous waste. how will you clean up the spills, not if, but when they happen??? i feel this government is not prepared for this enormous task. god help america if you do!!!

a very concerned citizen
